# VELOCITI RFID

**YOUR PATH TO A COMPLETE, CUSTOMIZED RFID SOLUTION**

We offer end-to-end consulting and design, hardware and software, and full implementation of RFID systems by applying our technical expertise, real-world experience, and know-how in large-scale project management.

## WHAT IS RFID?

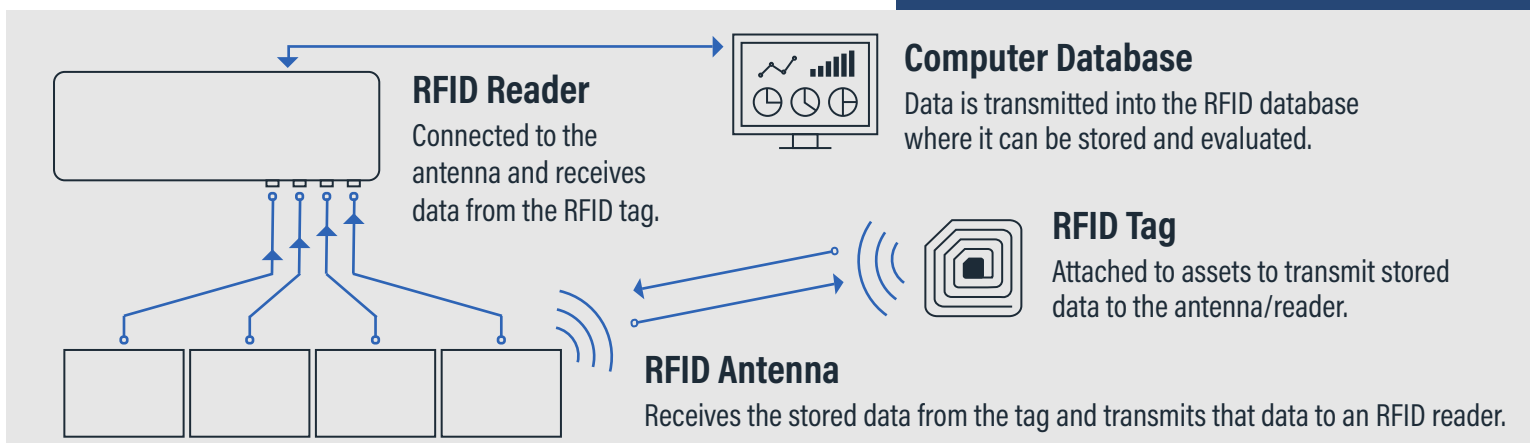

Simply stated, RFID is the utilization of radio frequency to identify an asset that has been equipped with a unique identification tag. The tags can be programmed to contain as little or as much information about the asset as possible.

An RFID system consists of a tiny radio transponder, a radio receiver and transmitter. When triggered by an electromagnetic interrogation pulse from a nearby RFID reader device, the tag transmits digital data; usually an identifying inventory number, back to the reader. This number can be used to track inventory goods and other programmable information.

## HOW IT WORKS

## THE BENEFITS:

- Increase Inventory Control/Accuracy
- Retail Process Improvement
- Increase Supply Chain Visibility
- Shipment Monitoring [Real Time]
- Facility Staging for Increased Product and Material Flow
- Synchronize Workflow Activities to Eliminate Delays and Downtime
- Part Authentication
- Nonconforming Materials Compliance
- Facility Safety; Parameter Control
- Reduce Headcounts
- Immediate ROI
  - Increased Sales [Eliminate Inventory Silos]

## WHY **VELOCITI**?

Velociti is an agile technology provider who meet our customers where they are, therefore providing RFID solutions that solve current challenges and expand for future opportunities. Our ability to deliver best in class RFID design and consultation services through hardware and software solutions maximize your operation efficiency without the pain that multiple vendor solutions may bring to a project. Velociti provides a range of opportunities through our field proven RFID solutions.

Velociti has a unique position within the connected supply chain, combining our rich history in the transportation space with enterprise IoT support within the warehouse, fast casual, QSR, manufacturing, hospitality, retail, agricultural, and construction markets.

### **BUILDING THE CONNECTIVITY BETWEEN IT AND OT**

- We employ a **Business Outcome Design Approach**. Customer outcome objectives drive process and technology choices.
- **Unbiased Technology Strategy**.
- **Agnostic Partner Model**. Our outcome and services-led approach supports a multi-vendor strategy. However, we strongly believe that fostering strategic and collaborative relationships with best-in-class providers enables us to deliver optimal customer outcomes.
- **Simplified Operations**. We work closely with leading technology providers and business operators to design, integrate and deploy systems with comprehensive services and support.

## FULL LIFECYCLE **SUPPORT**

### **PROTECT YOUR INVESTMENT WITH VELOCARE**

As we rely more and more on technology in today's critical business functions, it's essential that it's always working. VeloCare ensures it does with its front-line support program that actively monitors technology uptime with proactive replacement.

You'll receive full lifecycle hardware management which includes installation, setup and device replacement if needed.
